ABOUT DENNISON TRAILERS

With over 50 years and 50,000 trailers behind us, Dennison Trailers is one of the leading manufacturers of commercial vehicle trailers.

Still family owned and run, our success is a result of a combination of innovation, engineering excellence and a total commitment to customer service.

Engineering is at the heart of Dennison's business with a team of highly qualified and experienced engineers dedicated to continuous research and development to make Dennison trailers the best engineered trailers on the road today.

We pride ourselves on our 'build to last' philosophy. All our fabrication work is carried out by welders trained to international standards EN 287 and 288 and every stage of production satisfies our rigorous quality control systems.

From our modern factories in Lancaster and Naas, Dennison constructs its trailers from a range of different grades of steel and use only quality branded running gear and state-of-the-art manufacturing processes, making our trailers some of the most durable on the market.

We provide all our trailers with the best in-service back-up possible. Every customer, whether an independent owner-driver or a household name distribution fleet operator, receives the highest level of personal attention and experienced support.

DENNISON
WE'RE RIGHT BEHIND YOU
